Christine Furno, Town Clerk
Douglas Municipal Center
29 Depot Street
Douglas, MA 01516

Dear Christine,

As you know, my family has been planning a move out of Douglas. Yesterday we closed on our new house in Northborough. Tomorrow we are moving. It is now that bittersweet moment where I must resign all official positions in the Town of Douglas, effective at close of business tomorrow, September 21, 2016.

I believe my currently-held official positions are on the School Building Committee, Cable Advisory Committee, and Democratic Town Committee. Should there be others not listed, those, too, are included in this resignation.

I am more than happy to continue in any unofficial duty the Town would have me, such as assistance with the Town web site, Cable equipment, and closing out the School Building Project.

Douglas has been my home for nearly twenty years, the longest I've lived anywhere, and will always remain a place of fond memories.

I'm endlessly appreciative of the responsibility the Town has entrusted in me with over the years. I've enjoyed my service on the Board of Selectmen, School Committee, Democratic Town Committee, Cable Advisory Committee, two School Building Committees, Capital Improvement Committee, Cultural Council, two School Superintendent Search Committees, Town Administrator Search Committee, and probably a few others.

Please call on me anytime if I can ever be of assistance.

Truly yours,

Mitch

cc: Michael Guzinski, Town Administrator
Leslie Breault, Secretary, School Building Committee
Tom Devlin, Vice Chair, Cable Advisory Committee
Lisa Mosczynski, Chair, Democratic Town Committee

Douglas Meeting Room

Scope of work

A 75" professional Sony monitor will be mounted to the left of the selectmen. Near this monitor will be two jacks one of which will be a VGA input and the other will be HDMI. These signals will run back to the cable room. Inside the cable room will be a 7 input scaler consisting of 2 VGA inputs and 5 HDMI inputs. The signals from the wall jacks will occupy two of these inputs. The other 4 HDMI inputs are available for use as you see fit. Suggestions included having both AppleTV and Chromecast for wireless connectivity. Douglas cable will need to purchase these items but ISG will install them into the scaler and assist with network integration.

The scaler has two outputs and the VGA output will feed into the cable video switcher via scan converter. The scan converter will handle HDCP content. In order to pass HDCP protected content the town or the cable committee will need sign a contract with the manufacturer. The contracts will state that the town and cable committee will not use the device for any illegal activities (ie copying protected blu-ray movies). This device is key since certain items like the Chromecast have copy protection turned on all the time even if just displaying a local Google doc. The second HDMI output will feed back to the 75" monitor.

Both the VGA and HDMI signals will be converted with active boxes in order to travel the required lengths between the rooms.

There will be a 22" monitor with a cable input mounted at the rear of the room next to the cable room so that the selectmen and administration can see the channel live during meetings.
